1 February 1956

Hal -

Enclosed is approval of the method of handling the disposition of the scrap parts and redundant special tooling. I understand (pursuant to our discussion in July, 1955) that this is your standard AF approved procedure and that documentation is available with respect to tooling declared surplus and fabricated parts declared redundant.

Since we have no representative in your plant to carry through on the procedural aspects of the approved method on our behalf, and in order to provide you with a contact with which you may wish to consult on any particular problem inherent in this method, I am requesting that Charlie from the site visit you in the immediate future to familiarize himself with such method, and with any particular items which may be in question. It will not be necessary for Charlie to approve each particular disposition of scrap or tools, since we will rely on your individual documentations in this regard, but rather to be in the position of being personally familiar with the situation so that he may advise you and recommend to us.

George
